

Technical Data Sheet

High Pressure Sprayduster 300ml, Item 743.300

Product description

High pressure, high level of purity, high level of efficiency, leaves no residues, does not attack materials, non-flammable, odourless.

Area of use

Especially for outside installed machines like (ATMs-, Post Office Machines, Ticketing Machines, Parking- and Petrol Stations, Vending Machines, etc.). Also for cleaning of ICT and office equipment (e.g. keyboard, printer, CD-ROM, DVD- and Blu-ray devices, copier, fax, etc.), electronic equipment and components, data processing equipment, personal computers, optical instruments, photographic materials, microscopy and laboratory equipment. Efficiently cleans difficult reachable areas in equipment (electronics and mechanics). Spider webs, vermin, sediments and finest particles of dust are easily removed.

Benefits

Machine failures due to contamination and dirt are drastically reduced. Ideal for machine maintenance in the field and in repair shops. Dynamic, intelligent spray nozzle to dose strength of air jet. Simple and easy handling.

Accessories

Extension tube (70 cm) with adequate adaptors for High Pressure Sprayduster to enable usage in any position and enable access to any area in the equipment. Item 741.001.000 (1 unit/bag)

Technical data

Description:	Tin plate can with spray nozzle, extension tub
Odour:	Odourless
Density at 25° C:	1,20g/cm ³
Pressure:	7 bar (+25°C)
Flashpoint:	Non-flammable
Material compatibility:	Very good
Evaporation:	Complete

Storage / Shelf Life

Shelf life is 2 years if stored correctly.
